LPA. Just do it.

www.quality-connect.de

The mobile solutions by Quality Connect enables you to bring Layered Process Audit (LPA) or Layered Process Confirmation (LPD) smart-like into your business.

LPA Manager

The LPA Manager does not only meet the requirements set by the IATF 16949 but also those of your clients. Making it your decision to choose between pen and paper or digital application on your tablet or smart-phone.

How does the LPA Manager work?

The LPA Manager provides you with useful functions such as the flexible LPA checklists which can be manipulated with additional information, photos, etc. All of this instantly and on site.

These checklists are easily edited by the digital pen or smartphone and tablet. Further, the cloud function prevents the so-called "media disruption" due to its instant evaluation without multiple data-acquisition while at the same time making it available from any device or location.

Factory departments, hierarchical layers, etc. can be included and configured which makes Mobile Solution a tailor-made application accessible either restricted or unrestricted for each employee.

All executed Audits are being evaluated and archived automatically.

For us the employee marks the most valuable asset of a company which makes our application not only easy to comprehend but also user-friendly making it very efficient and effective.

We think that a sustainable work space with an overarching communication between co-workers brings the best response to any quality problems being faced on a daily basis.

LPA works in all aspects of a company: Production, administration and organisation.

FEATURES

- Freely shareable layer-structure with assigned processes and jobs

- Individual process-and layer assigned LPA questionnaire

- Simple administration of the LPA checklists and output-driven question-generation

- Smart LPA implementation with the smartphone, tablet or digital pen

- Individual visualisation, evaluation and key performance indicators

- Automatically archived and maximal data integrity

LPA
Step-by-Step

Implementation

- Audit plan
- Checklist visulisation
- Tablet/PC
- Digital pen
- Evaluation of questions
- Automatic data capturing
- Audit verification and -history
- Documentation

Checklists

- On-topic questions ᴜgen
- Automatic dynamisatioɴisierung
- Individual Questionnaiᴛaloge
- Recent complains ᴇn
- Input from 8D-Report
- current internal faults ᴇr

Measures

Conduct with

The best solution for pragmatic and functioning LPA

The LPA method

Strict realisation of standards.
Continuous improvements with simple checklists.

+ Layered Process Audit (LPA) is a highly effective method to improve results from procedures in a sustainable way. LPA secures the implantation of before-hand arranged
+ standards.
  LPA questions are aligned each singular to postulated
+ process results and thereby continuously challenged to meet the best possible outcome
+ LPA is THE tool to conduct a risk-based Auditing in your business.
+ Current events like complains, faults or risks generate new questions
+ Regular short-Audits prompt compliances with arranged standards
+ Auditor is usually the in-charge executive and the auditee is the respective employee in the process
+ Deviations from stipulated standards will be directly rectified by the executive or employee
+ Not instantly rectifiable deviations will run through methods until solution is found while maintaining a close eye
+ The Audit results will be coloured (green, yellow, red) and later be visualised on boards
+ LPA re-enforces good leadership through direct compunction between the executive and the employees

Mobile Solutions.
Made in Germany.

Quality Connect

The **Quality Connect GmbH is** THE provider of innovative mobile quality solutions.

The Quality Connect GmbH offers innovative and successful solutions for accelerated acquisition, processing and analyses of quality data. We stand for pioneering work in mobile quality solutions - that works. Our highest goal is to successively supply our clients with improved products and processes as to maintain our elevated level of competency. We are not only prepared for Industry 4.0 but we are Industry 4.0, so to speak.

We are looking forward to see you.

Do you want to know more about our smart quality solutions?

Just give us a call and we will try to provide you with thorough and individual information - no strings attached.

LPA Seminare

Our seminars (duration: full-day) offer you a comprehensive understanding of the LPA method. You will receive insight into our LPA Manager and will be able to appropriate applicability with specific trial exercises for your business.

Seminar content:

In practical orientated exercises, you will learn the method and the implementation of the LPA Manager. You will create different layer-structures, create questions and put together your own LPA-Checklist after which you will develop a visualisation. Audits will be conducted through analogue forms with the digital pen and digital forms on mobile devices.

Dates 2017

26.06.2017 [Potsdam]
21.08.2017 [Potsdam]
26.09.2017 [Düsseldorf]
06.11.2017 [Stuttgart]

Seminar expenses
280 Euro per Person (including VAT)

The fees include training documents, beverages, coffee breaks with snacks and a lunch. In the case of purchase of the LPA Manager of Quality Connect the seminar fees will be added accordingly.
